**Re: Terrestrial use of the 2473-2495 MHz Band for Low-Power Mobile Broadband Networks; Amendments to Rules for the Ancillary Terrestrial Component of Mobile Satellite Services, *IB Docket No. 13-213, RM-11685.***

Dear Ms. Dortch,

Hughes Network Systems, LLC (“Hughes”) filed comments on November 18, 2016 in support of Globalstar, Inc.’s (“Globalstar”) November 2016 written *ex parte* presentation requesting that the Commission narrow the relief originally requested in the November 2013 *NPRM*<sup>1</sup> to allow Globalstar to use its 11.5 MHz of licensed mobile satellite service (“MSS”) spectrum at 2483.5-2495 MHz for low-power terrestrial broadband services.<sup>2</sup> Hughes would like to amend its last sentence to clarify that its comments are limited to the use of the 2483.5-2495 MHz band, and not the entire 2473-2495 MHz band that is the subject of Globalstar’s *Ex Parte*.

Respectfully submitted,

/s/ Jennifer A. Manner
